Specific Protective Equipment and Precautions (Firefighters) As in any fire, wear self-contained breathing apparatus (SCBA), NIOSH (approved or equivalent) and full protective gear. Extremely flammable liquid packaged in an aerosol spray canister using a flammable gas propellant. Vapors are heavier than air and may travel to sources of ignition and flash back. Avoid high temperatures and static charges.

6. ACCIDENTAL RELEASE MEASURES

SAFETY DATA SHEET

Personal Precautions, Protective Equipment and Emergency Procedures

Clean up personnel should wear rubber gloves and goggles to prevent irritation from contact. In case of spill or rupture, avoid breathing vapors and ventilate area well. Remove all sources of ignition and use non-sparking equipment. Soak up with inert absorbents. Allow absorbents to dry and dispose in accordance with local/regional/national/international regulations.

Environmental Precautions Methods and Materials For Containment and Cleaning Up

Do not allow product to reach sewage system or any water course. No special measures are required; refer to environmental and personal precautions, and other sections of this document.

7. HANDLING AND STORAGE

SAFE HANDLING PRECAUTIONS

Personnel should wear the appropriate equipment when handling the paint in order to minimize the chance of contact/exposure. Boron Nitride is slippery, and is considered a slip hazard if spilt on a walkway. Practice good housekeeping.

SAFE STORAGE PRECAUTIONS

Do not store in heat over 122° F (50° C). Do not spray into open flame or on hot surfaces. High temperatures may cause bursting. Do not puncture or incinerate. Keep out of reach of children. For warehouse storage, pallets, and cases should be placed to avoid damage or rupture from material handling equipment. With use, spray aerosol carefully and cap after each use.

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

Exposure Limits/Guidelines

Engineering Measures/Controls

Provide adequate ventilation to control dust or vapors below the regulated exposure limits (PEL and TLV).

Personal Protective Equipment

Protective clothing should be selected specifically for the workplace, depending on the concentration and quality of the hazardous substances handled. The chemical resistance of the protective gear should be inquired from the respective supplier.

Respiratory

An appropriate NIOSH-approved respirator must be worn if exposure is likely to exceed the lowest TLV/PEL rated regulations.

Eye/Face

Safety goggles or side shielded safety glasses are recommended for any type of industrial handling.

Hands

Use impervious gloves.

Skin/Body

Normal work clothing. Note that long sleeved shirts, long pants and gloves are recommended.
